

Human Pose Estimation: PoseNet

Flavio Amurrio-Moya, G00593001

famurrio@gmu.edu

1 Source Paper

Section: "Source paper": full reference of the paper (authors, title, venue and year of publication)

2 Source Code

Section: "Source code": language used; list of libraries used and for which task; description of the code you wrote and for each tasks

3 Methodology

Section: "Methodology": Brief and clear description of the algorithm you have implemented

4 Experiments

4.1 Experiments Description

- Description of the experiments you have conducted

4.2 Source Paper Results

- Clearly identify the results in the source paper that you have replicated or tried to replicate in case you had to make adjustments

4.3 Dataset Used

- Description of the data used and link to the data: number of samples, number of features, number of classes, etc.
- Provide a link to the data.

4.4 Evaluation Measure

- Evaluation measures used

4.5 Training and Testing

- Discuss how training and testing were conducted; cross-validation techniques; numbers of runs, etc.

4.6 Experiment Results

- Tables and/or Plots of the results

4.7 Analysis

- Presentation, Discussion, and Analysis of the results
